ENA 7

Technical overview

JURA standards	
Variable brewing unit from 5 g to 16 g	■
Intelligent Pre Brew Aroma System (I.P.B.A.S.©)	■
Additional ground coffee powder	■
Hot water function	■
Cappuccino frother	■
Height-adjustable coffee spout	■
Energy Save Mode (E.S.M.©)	■
Multi-level conical grinder	■
CLARIS filter cartridge	■
High-performance pump, 15 bar	■
Thermoblock heating system	■
Integrated rinsing, cleaning and descaling programme	■
Adjustable water hardness	■
Zero-Energy Switch or power switch	■
Swiss made	■

Specific benefits	
Powder recognition for additional ground coffee variety	■
Intelligent preheating	■
TÜV certificate for user-friendly user manual	■

Settings and programming options	
Programmable amount of water	■
Amount of water can be adjusted for each preparation	■
Adjustable coffee strength	3 levels
Coffee strength can be adjusted for each preparation	■
Programmable brewing temperature	2 levels
Plain text display	■
Rotary Switch	■
Monitored drip tray	■

Design and materials	
Height-adjustable coffee spout	65–111 mm
Rotating coffee spout	■
Connector System©	■

Accessories	
Cup Warmer	optional
Cool Control	optional
Professional Cappuccino Frother	optional

In Figures	
Water tank capacity	1.1 l
Bean container with aroma preservation cover	125 g
Cable length	approx. 1.1 m
Voltage	230 V AC
Power	1450 W
Energy consumption	13.5 Wh
Energy consumption with E.S.M.©	4 Wh
Stand-by power	0 W
Weight	9.3 kg
Dimensions (W x H x D)	23.8 x 36 x 44.5 cm
Checks	CE
Colours	Ristretto Black Blossom White Coffee Cherry Red

ENA 7

SWISS MADE

Slim machine, broad consumer base

When JURA launched the ENA, the slimmest automatic coffee machine in the world, it raised the bar yet again. With over 100 000 machines sold worldwide in the first 18 months, the ENA was the most successful product launch in JURA’s history, showing that a premium product is perfect for both new users of automatic coffee machines and current users upgrading to a new model. JURA has already scooped up numerous international design and energy efficiency awards for the ENA. And for discerning customers in this segment there is now the ENA 7, the best compact automatic machine in its class.

Coffee kick

The new Aroma Boost function provides a natural, refreshing energy boost when you need it. Aroma Boost freshly grinds the maximum possible amount of powder at the touch of a button and extracts it in the variable brewing unit under optimum conditions to make an extra-strong espresso or lungo.

Eco-intelligence

Saving energy doesn’t mean having to sacrificing enjoyment. Quite the contrary. In Energy Save Mode (E.S.M.©) the JURA ENA 7 uses up to 40% less energy. The patented Zero-Energy Switch switches the machine off after coffee preparation and the automatic switch-off rinse and disconnects it completely from the mains. With ENA 7 you can be ecological without being any less indulgent.

The direct route to enjoyment

Because the buttons are clearly arranged and labelled, preparing a wide range of speciality coffees is extremely simple. Just a touch of a button and the ENA 7 prepares freshly ground espresso, coffee and specialities made from preground beans. And of course it also dispenses hot water and steam.

It’s all about perfection

ENA is a true 2-cup automatic speciality coffee machine, and can prepare either one or two cups at the same time. To guarantee that an optimum crema is formed every time, the coffee spout can be set to prepare either one or two cups simply by turning it. It goes without saying that its height can also be adjusted smoothly from 65 to 111 mm to suit the height of the cup.
